

Declaration of Biodegradability allPHA

colorFabb

Date of issue: January 1st, 2024
Version: v1.1

The raw materials used for the colorFabb allPHA material are biodegradable, as been determined by TÜV AUSTRIA Belgium.

The rewarded certifications for the ingredients of the colorFabb allPHA material are as follows:

The raw materials of our allPHA product comply with the Regulation (EC) No. 1907/2006 in terms of Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH).

According to biodegradation studies (ISO 14855-1), all polymer components of the allPHA do fulfil the 90% biodegradation requirement within the prescribed test period of 12 months as stipulated by OK compost HOME program of TÜV AUSTRIA Belgium.

Disclaimer: The information is based on our supplier's statements; we have not carried out our own tests.

The suitability of the finished article for the intended use and end-of-life options must be tested and validated by the manufacturer or supplier of the final product.
